

# 1, 2, 3...for the Butterflies and Bees Program

Native plant sun kit 2024.

Support pollinators and climate resiliency in your community by planting a pollinator habitat kit! Kits are free to individuals and community groups that reside within the RCRCD district boundary. Kits include 100% California native shrubs, trees and annuals grown from locally harvested seed. Gardening with natives has many benefits:

- Low water
- No fertilizer required
- Support local wildlife
- Adds green space to urban areas
- Cleaner air and carbon sequestration
- Native plants qualify for rebates under the turf removal program

A limited number of kits are available each year. Each kit covers an area of 150-1000 sq. ft

Riverside-Corona Resource Conservation District

4500 Glenwood Dr., Riverside, 92501
